Rio, August 21st, 2009

Dear friends from ABC,

It's a pleasure to participate at public art projects for urban spaces, your invitation could not have come in a better moment. Since 2005 we began to develop a long duration Project on the outside wall of our gallery as an attempt to have direct communication with the general public of our particularly alive and popular neighborhood. So far we have had 10 projects by different artists, from our gallery and other galleries, each one of them being sponsored by a different collector. These artists have taken it pretty much beyond any flat painting, billboard and etc. A few times we have had to go to the police, city departments or newspapers to explain unexpected concepts of the artists.

The project that is going on now has been developed by very young artists named Tiago & Gabriel Primo. Through alpinist techniques, they built a practical-symbolic painting-sculpture-installation vertical home where they have been living from time to time during the last four months. We think this is a fantastic comment to project for urban spaces.

For the ABC exhibition Tiago & Gabriel Primo are developing a video conceived as the view from the passing people in front of their intervention at S.A.A.R.A in Rio de Janeiro, to be projected from Egon Eiermann's table at the wall.

All the Best regards  
A Gentil Carioca
